SAXONY! – A BUSINESS LOCATION IN TOP FORM

There are many good reasons why Saxony is a top location for international companies such as Volkswagen, BMW, Porsche, Infineon, Meyer Burger, Oerlikon, Kühne & Nagel, STARRAG and many more.

Saxony is the ideal logistics location. At Leipzig Airport, for instance, DHL runs its European air cargo hub 24 hours a day, 365 days a year. Saxony's greatest strength is its people. In terms of qualification, Saxony's skilled workers lead the way in Europe. Their entrepreneurial spirit ranks first in Germany.

And Saxony is captivating, as Germany's no. 1 cultural destination with more than 1,000 palaces and castles, and over 400 museums. The handicrafts produced in Saxony are also world-famous, such as watches made in "Glashütte, Saxony" or MEISSEN® porcelain.

BÜMAG eG
DIE BÜRSTENMACHER
by BÜMAG

On the 24 of September 1946, 140 independent brush manufacturing companies established a co-operative – the **BÜMAG**. The objective was to assure the material procurement for the member companies. After the collapse of the DDR in 1989, the remaining 25 companies decided to maintain the co-operative in order to better cope with the difficult economic situation. Today the BÜMAG has 14 owner operated member companies. We are responsible for centralised purchasing of material as well as for marketing and sale of the products. Additionally, we support our member companies in all questions concerning finances, accounting and technology. Thanks to the structure of the company, we are able to manufacture a wide range of standard products for the fields of household, business and catering. We offer complete solutions accordant to the self service requirements as well as individual and custom-made products. Our assortments can easily be compiled for the most diverse purposes. Due to the new high rack storage area with a storage capacity of 4000 pallets and the fast-moving storage area of approx. 2000 sqm, we will be able to quickly respond to customer requirements also in future. The positive development of the previous 60 years is also evidenced by the continuous increase of international acceptance. With an export share of about 35%, we are not only active in European markets but also in many other important international markets. Every year we take part in trade fairs such as in Frankfurt, Cologne, Dubai and Hong Kong in order to further expand the existing customer relations and successfully acquire new customers. This is given an additional impetus by the fact that our company has successfully passed the examination of the FSC-Deutschland and that we received the GFA Hamburg certification. Many products can now be labelled with the FSC and PEFC logos. The company is certified by TÜV and meets the requirements of ISO 9001:2008.

More and more people are focusing their lifestyle on health and sustainability. Values such as quality and purity are increasingly gaining importance. The FlaxFloor Collection by Halbmond employs the unique advantages of natural linen fibres and applies these to modern living areas and workspaces.

The natural properties of the fibres give the linen flooring its unmistakable character. FlaxFloor offers high-quality linen and excellent durability. The fibres also fully maintain their structure, even under heavy use. In addition to the high-quality workmanship, the excellent thermal conductivity and natural design guarantee comfort underfoot.

Heliatek is the technology leader in the field of Organic Electronics Energy. Heliatek holds the world record in this field with a PV efficiency of 12%. Through both its leading edge material development and its proven capability for manufacturing Heliatek is the first company to begin commercialization of large area OPV solar film. Its business model is to supply the custom-designed HeliaFilm® to partners in industries such as building and construction materials, automotive and light architectural structures. In a variety of first pilot projects Heliatek has successfully combined the solar film with materials like glass, concrete, metal and PVC membranes.

As a spin-off from the Technical University of Dresden and the University of Ulm, Heliatek maintains today a total staff of some 85 specialists at its facilities in Dresden and Ulm, Germany. Investors in Heliatek include leading industrial and financial companies such as BASF, Bosch, Innogy Venture Capital, Wellington Partners, eCapital and Aqton SE.

Energy consulting is an important instrument to reduce information deficits in companies through qualified and independent counseling. It also helps identify the appropriate energy savings potentials and assists in the implementation of the requisite energy savings. Towards this end, energy consulting is designed to highlight the economically viable energy efficiency potential in buildings and facilities as well as in user behavior. That's why energy consulting pursues the objective of identifying existing energy savings potentials. In addition, energy consultants assist companies in implementing the identified savings potentials and help them launch the requisite measures in order to increase the implementation rate even further. The economical use of energy in companies can make a vital contribution towards assuring a secure energy supply and climate protection.

Schleicher Sicherheitssysteme (Leipzig emergency locksmith services) was founded in 1990 in Leipzig, and is today one of the leading companies setting up security systems in the region.

In addition, the company also advises international customers and offers its services in the field of systems solutions and implementing security strategies. As well as sales and consultation on complex electronic and mechanical locking systems, we also provide a 24h emergency locksmith service in Leipzig. Schleicher Sicherheitssysteme is one of the region's few certified specialists installing ABUS wireless alarms, and can provide well-founded expert advice at our ABUS Security Center.

Thanks to the ongoing qualification courses we offer our staff, Schleicher Sicherheitssysteme also boasts all the key, well-known certificates and authentications in the field of security technology and locking systems.
