SAXONY! – A BUSINESS LOCATION IN TOP FORM

There are many good reasons why Saxony is a top location for international companies such as Volkswagen, BMW, Porsche, Infineon, Meyer Burger, Oerlikon, Kühne & Nagel, STARRAG and many more.

Saxony is the ideal logistics location. At Leipzig Airport, for instance, DHL runs its European air cargo hub 24 hours a day, 365 days a year. Saxony's greatest strength is its people. In terms of qualification, Saxony's skilled workers lead the way in Europe. Their entrepreneurial spirit ranks first in Germany.

And Saxony is captivating, as Germany's no. 1 cultural destination with more than 1,000 palaces and castles, and over 400 museums. The handicrafts produced in Saxony are also world-famous, such as watches made in "Glashütte, Saxony" or MEISSEN® porcelain.

3D^{IT}

3D^{IT} sets new standards in 3D real-time visualization

3D^{IT} is your specialist for the virtual presentation of construction projects. We produce three-dimensional models of interior design compositions or entire buildings and facilities. By bringing your construction data to life, we enable you to present your property in the best way possible. Indeed, our interactive 3D models allow you to explore every angle and prevent planning errors before the first stone is laid. Involve your clients by literally walking them through the building. They can even rotate, zoom, enter, use, configure or take part any objects they like in true real-time!

By combining 3D computer graphics with gaming technology, our virtual applications that can be implemented offline on a PC, plugin-free in web browsers, and mobile on tablets.

These interactive 3D solutions are applicable in a wide range of business areas: planning & construction, marketing & sales, service & audit, monitoring & tracking.

BÜMAG eG
DIE BÜRSTENMACHER
by BÜMAG

On 24th September 1946, 140 independent brush manufacturing companies amalgamated to the registered cooperative society “BÜMAG”. They pursued the objective of ensuring the material procurement for all member companies. Even in the difficult economic times after the collapse of the GDR in 1989, the 25 remaining establishments decided to regenerate their fortitudes for a continued existence.

In 2014 the BÜMAG eG purchased the production of the former Flamingo, a limited liability company which is now the largest producer itself, employing 130 people in the cooperative association. Today there are a further 14 owner operated member companies belonging to the BÜMAG eG.

Thus, the BÜMAG eG takes up responsibility for a centralized buying of material, as well as for production, stock-keeping, marketing and selling the products. Additionally the member companies are supported in all questions regarding to finances, accountancy and technology.

We also contribute to an environmentally friendly handling of our world's resources. Therefore we have agreed to the inspection by FSC Germany. As a result of the audit a whole range of products have been certified – now carrying the FSC-logo.

Why do I not hear my footsteps? Am I keeping my feet dry? What is a plastered walkway doing in this building?

Water without moisture, lawns without nettles, wood without clicking, metal without clanging, a beach without sand?

Yes, but everything is functional, atmospheric and comfortable – on hard-wearing carpets from Halbmond.

It is the interplay of the elements, design and technology with which the flooring can create unique themed worlds of experience.

The 'Pure Elements' design guide offers inspiration for the design of hotel, shop and office spaces. Whether it is an eye-catching feature, a natural-looking impression or an exciting combination of various elements – the possibilities open up an interesting degree of scope.

The HIPP Spring Action Chair

The **HIPP Spring Action Chair** – the latest innovation in ergonomic chairs for home and office.

With its unique 3D spring, the **HIPP Spring Action Chair** lets your pelvis move unrestricted in all directions, combining the freedom of a stability ball with the comfort and support of an ergonomic office chair.

When you sit on the **HIPP Spring Action Chair**, the unconstrained tipping and circular action keeps your spine and pelvis in motion. As you unconsciously make continual small adjustments to your posture, you never sit entirely still, and you automatically train the muscles that support and protect your joints and spine.

Our range of products offers a variety of chairs with good value for money.

We build our chairs in our own factory and can tailor them to your sitting needs, your height and weight (up to 160 kg), and to your preferred color, embroidered logo design, and materials such as textiles and leather.

The NESTLER System GmbH is a medium-sized company that emerged from the engineering office Nestler. Since 2007 we have increasingly specialized in the field of project controlling in steel, plant, and civil construction for private or public building owners.

Our NESTLERsmartBIM unites all data and information of every single component and every process section on a standardized basis – fully documented, always up-to-date, prepared for all users and available from any location.

The NESTLERsmartBIM is not only a software solution but much more a method of operating to support the project management of large-scale projects more effectively.

The System evolved from the experience gained from the involvement in seven large-scale power plant projects and other civil construction projects. Thanks to our specialists and our unique software solution we are the ideal partner for project management of large-scale projects.

We provide you with a unique service and an extraordinary cost-benefit ratio. Benefit from the most advanced solution currently available on the market. Discover the difference and participate in the future of cross-company project control.

History of the “Child’s Flower Garden”

It was in 1906 in Dresden when Karl-Max Seifert developed the so-called “Dresdner Garten-Bau-Kasten” - Child’s Flower Garden. This construction kit was designed for people to arrange blocks in order to build various baroque gardens. Seven original building instructions have been preserved and added to the current kit. The front of the Child’s Flower garden shows the Great Garden and the Dresden Palace. Karl-Max Seifert, who was interested in arts, maintained close contacts with “Die Brücke” (The Bridge), a group of artists, which is known all over the world today. Among its members were people like Emil Nolde, Ludwig Kirchner, Erich Heckel, Karl Schmidt-Rottluff and Fritz Bleyl. It was Karl-Max Seifert who provided this group with a hall for their first exhibition.
